

# Quality Center of Excellence

**“Quality should be everyone’s responsibility.” -W. Edwards Deming**

Given the increasing complexity in regards to software development, it is not coincidence that some organizations lack time, expertise and technology to deliver high quality software on time and within budget. The Chaos report from the Standish Group states that

- **31.1% of software projects are cancelled prior to delivery**
- **52.7% of software projects cost 189% more than estimated**
- **16.2% of software projects are completed on time and within budget in small organizations, whereas large organizations tend to complete 9% of their projects with only 42% of the requirements and functionalities implemented**

*How then can you be sure to maximize your return on investment of software projects when facing these kinds of statistics?*

Supported by key **Quality Assurance** principles and **Quality Control** techniques, our approach is focused on preserving **functional integrity** and **total quality** within your **projects, processes** and **products**.

**How may we help you?**

**Qualibre Technologies Quality Center of Excellence is a strategic solution to help you increase the success of your software projects in order to reach your business goals and solidify your position in the market.** We offer you the possibility to outsource your Quality Assurance activities to our expert consultants. They will help you to:

- **Implement different services from within our P3 Quality Approach**
